

Job Req#: 1049 – Senior Manager, QA Compliance

La Jolla Biologics is a biologic pharmaceutical product development and manufacturing organization aiming to provide high quality, value added capabilities to accelerate the introduction of biologic therapeutics to the global market. We have an exciting opportunity for a Senior Manager of QA Compliance at our location in San Diego, CA.

Job Summary:

The Quality Assurance Senior Manager of Compliance is responsible for coordinating and maintaining all cGMP compliance aspects of procurement and production operations. Primary responsibilities include, but are not limited to, managing the supplier qualification program and maintaining the Approved Vendor List, performing vendor audits as well as routine internal audits to ensure compliance with applicable regulations, assisting with identifying procedural gaps and creating or revising procedures related to compliance with applicable regulations, and working closely with Legal, QA Management and Vendors to help facilitate the execution and management of various Quality Agreements, as required. Performing audits may include entering and operating within a standard laboratory, cleanroom or warehouse environment.

Requires a Bachelor's degree with a minimum of 15 years of Quality Assurance/Quality Systems related experience in a cGMP biologics regulated manufacturing environment is required and experience supporting regulatory audits. Familiarity and experience working in an ERP system required.
