

**Job Req#:** 1065 – QC Associate

La Jolla Biologics is a biologic pharmaceutical product development and manufacturing organization aiming to provide high quality, value added capabilities to accelerate the introduction of biologic therapeutics to the global market. We currently have an exciting opportunity for a QC Associate at our location in San Diego, CA.

**Job Summary:**

The QC Associate is responsible for routine and non-routine product testing using biochemical methods and cell-based methods such as: qPCR assays, ELISA, Cell Based Bioassay, etc. Additional responsibilities may include assisting with transferring analytical methods from development into the QC laboratory and test method validation with guidance from a supervisor. Candidate demonstrates initiative to perform routine QC responsibilities such as sample coordination, lab equipment maintenance, QC document management, QC inventory control and reconciliation of sample requests/documents as needed. Generates test results and report results for the assigned GMP testing in a timely and compliant manner. Knowledge of performing and validating cell-based assay, immuno-assays, and/or QPCR assays in a GMP environment is essential.

Requires a Bachelor of Science Degree in the field of molecular biology, chemistry, biochemistry, or a related scientific discipline with 2+ years of Quality Control experience in GMP biopharmaceutical or biotechnology industry. Ability to adapt and thrive in a highly collaborative environment and work flexibly are essential.
